

HEATLOCK™

Heatlock was created by isolating the warmest minerals in nature with low thermal conductivity to help absorb and retain body heat. This patented technology can be used in a lightweight application to provide powerful warmth.

Key Benefits

Increase Heat Retention

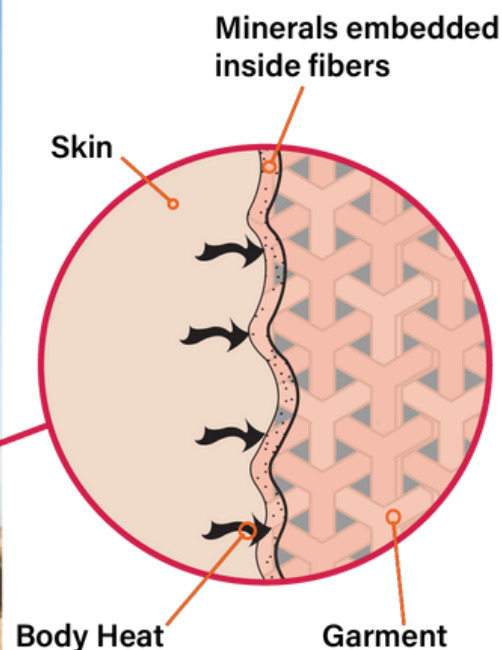

Lighter & Warmer

Improved Dry Time

Improved CLO Value

Low Impact Textiles develops the most advanced textiles on the market today.

Our pride stems from helping companies bring to market powerfully enhanced products.

We believe sustainability is a key part of the entire product development lifecycle. All of our technologies are available in various sustainable forms. We hold multiple patents and registered trademarks protecting our creations.
